

Assembly instructions

Mounting plate

Wall installation

1. Install the Airsystem boom with the mounting plate (a) to the concrete wall or the steel beam.
Attention: bearable hole load (e.g.: bolt 1/2") at least 30'000N
2. Connect the vacuum hose of the stationary vacuum cleaner to the vacuum port (b / 2") of the boom arm.
3. Connect the vacuum hose to the tube of the boom arm. Secure with the pipe clamp (c).

Maintenance

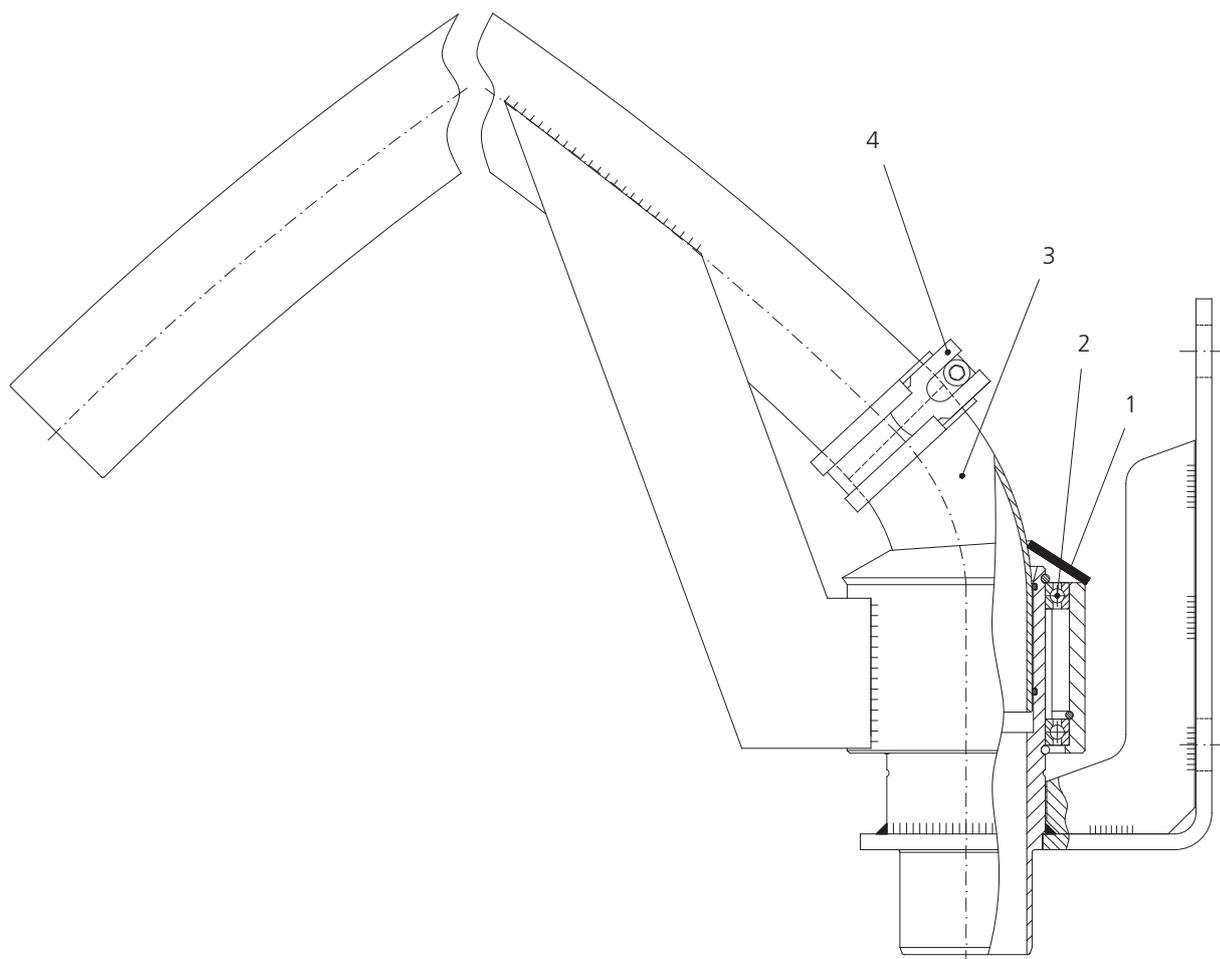

To avoid clogging of the airsystem boom, we recommended regular cleaning. Remove the elbow-90° (see detail drawing X above).

For your own safety

- Read all instructions before the initial operation. Check their proper condition and that they operate safely.
- Our products should only be installed by experienced users of high pressure equipment.
- Safety regulations and guidelines (Accident Prevention Rules) from the manufacturer of vacuum cleaners are applicable.
- No modifications to the unit are permitted.

Spare parts List

| Pos. | Part No. | Description |
|------|----------|-----------------------------|
| 1 | 901.975 | Rubber cone |
| 2 | 902.129 | Ball bearings |
| 3 | 903.134 | Elbow |
| 4 | 902.432 | Pipe clamp $\varnothing 50$ |
